PROJECTS

The Exhibit — Project sharing app

Used React.js, CSS3 and material UI for frontend. Node.js, Express, and MongoDB to handle backend CRUD operations. Implemented Socket.io for instant messaging, AJAX, JWT user authentication, AWS S3, React hooks, and Heroku deployment.

Budget Meets World — Budget planning app

A hackathon project created using React.js and CSS3 for frontend, Node.js, Express and MongoDB for backend. Implemented AJAX Axios, JWT user authentication, third party API - Hotels API, YELP API, and Skyscanner API.

S'more Recipes — Camping meal planning app

A full-stack Django app using HTML5 and SCSS/SASS for frontend. Python and SQL/PostgreSQL database for backend. Implemented CRUD operation, Django built-in authentication, and Heroku deployment.

Animal Crossing Guide — Villagers guide app

A game guide created using Javascript ES6, HTML5, and CSS3 for frontend, MongoDB, Node.js, and Express for backend. Implemented OAuth authentication, third party API - ACNH API, and Heroku deployment.

Simon — Memory game app

A retro memory game with a twist. Created with Javascript ES6, HTML5, and CSS3.

EXPERIENCE

YMCA, London, ON — *Dietary Planner*

DEC 2019 - Jan 2021

Constructed a three-month meal plan for 120 children to meet the individual needs due to health or religious restrictions. Responsible for ordering and purchasing while maintaining budget requirements.

Craigwiel Gardens, London, ON — *Dietary Aide*

DEC 2016 - JUN 2018

Participated in menu planning and nutrition programs for 80 residents. Ensure that procedures related to food production, sanitization, and therapeutic diets are followed by Ontario Long-Term Care Homes Act.

Henley Place, London, ON — *Dietary Aide*

NOV 2016 - MAR 2017

Ensured food is handled in a safe manner, including proper storage and handling. Executed proper food services in relation to internal and external guidelines and protocols.
